

## PHP Developer

**We're looking for a senior PHP developer with more than 5 years of experience, passionate about programming and willing to work on challenging projects.**

We are a strong team of 15 smart and honest people who do some pretty incredible and complex work. Always taking responsibility for the things we create, we never give up. We train continuously because we believe that professional and personal development get us to the top. We are young, ambitious, respectful and really funny.

**And we'd like someone like this in our team:**

### Soft-skills:

- smart
- funny
- honest
- motivated
- responsible

### Technical requirements:

- More than 5 years experience with PHP OOP
- Experience with PHP MVC frameworks: Codeigniter/ Laravel/ Zend framework/ Symfony 2
- Very good knowledge of relational databases: MySQL/ PostgreSQL
- knowledge of web technologies: HTML, CSS, Javascript (AJAX, jQuery)
- Knowledge about common web attack vectors (XSS, CSRF attacks, session hijacking)
- Good understanding of design patterns

### Nice to have:

- Knowledge of other programming languages
- Experience with any Javascript framework (AngularJS, Backbone JS, etc.)
- Experience in common third-party APIs (Amazon web services, Facebook, Twitter, Google, etc.)
- Experience with Linux systems
- Knowledge of noSQL databases (Cassandra, MongoDB)
- Deep understanding of the HTTP(S) protocol

## Responsibilities:

- Being involved in all phases of the development lifecycle (analyzing - planning - execution)
- Developing new features
- Maintaining existing web applications and modules
- Providing their technical expertise on request
- Writing unit-tests as part of their development process

## What we offer:

- the opportunity to show the world what you're capable of.
